

Circular – 15 – 2019-ECDIS, is CATZOC considered for UKC

Feedback

In addition to our ongoing regimes, three items for special focus (from PSC deficiencies) so that we can gauge the magnitude of any potential issues in these areas:

- 1- **Retained Fuel Oil samples. As flammable liquids, are these being stored in a locker protected by an appropriate fire-extinguishing arrangement approved by the Administration?**

Comment In FODO 6 : Section 6.3.9

- 2- **ECDIS Passage planning. Is the CATZOC considered as part of the UKC calculation set out in the SMS?**

Comment In FODO 6 : Section 7.3

- 3- **ECDIS System failure on primary ECDIS and both primary and secondary ECDIS. Are there prescribed SMS procedures?**

Comment In FODO 6 : Section 7.3

Where necessary deficiencies/recommendations to be given.
